

## Facilities Development Goals

As the Board seeks to provide and maintain facilities that will offer the best possible physical environment for learning and working, the Board aims toward:

1. Providing buildings and renovations that will accommodate and facilitate those new organizational and instructional patterns that support the district's educational philosophy, instructional goals, and growing population.
2. Meeting all safety requirements through the remodeling of older structures.
3. Providing building renovations as needed to meet state and federal requirements on the accessibility and usability of facilities to persons having a disability.
4. Building design, construction and renovation that will lend themselves to low maintenance costs and the conservation of energy.
5. Undertaking long range planning necessary to insure that, as much as is possible, new facilities will come on as needed and fit into the total school program.
